OVERVIEW
The Varex Imaging XPad™ 4336 is a wireless, lightweight, cassette-sized flat panel detector for digital radiography. It fits into a conventional table or wall-stand Bucky, just like a film-screen cassette.

Featuring a 15 million pixel image matrix, a best-in-class 100 μm pixel pitch, and a directly deposited CsI scintillator, the Varex Imaging XPad® 4336 provides exceptional image quality. True 35 cm x 43 cm (14” x 17”) image area per the ISO 4090 cassette standard is provided, along with a removable, rechargeable battery. Single-piece carbon-fiber construction for the front and back housing allows for easier placement and cleaning. Automatic Exposure Detection simplifies integration.
