OVERVIEW
Varex Imaging XRD 4343RF is based on the next generation platform of Varex Imaging amorphous silicon (a-Si) Flat Panel X-ray Detectors (FPDs). The enhanced performance Varex Imaging XRD 4343RF supports a full 43 x 43 cm$^2$ (17 x 17 in$^2$) field of view providing superior imaging for fluoroscopy, radiography and cone beam CT applications. The detector offers frame rates up to 85 fps and has a direct deposited Cesium Iodide scintillator for superior image quality. Rapid system integration is accomplished with real time image processing PCIe board for host computer, integrated trigger and X-ray synchronization circuitry and a comprehensive software library for image acquisition and processing.
